

WATER SCRUBBING VENTILATOR

The Molitron WATER SCRUBBING VENTILATORS are UL Listed and NSF Approved for use over heavy-duty grease producing cooking equipment. The ventilator, in conjunction with a low voltage programmable logic controller, removes odors, smoke and grease from the cooking area and exhaust air. This system provides maximum grease extraction efficiency, clean ventilators and duct work, reduced (if not eliminated) cleaning of exhaust ducts and less contamination of the atmosphere. Three models are available.
